

Pilots & Volunteers lending a hand.

DEAR FELLOW AVIATOR:

Thank you for your interest in CAIR Flight, Inc. As a volunteer pilot, you are essential to our mission. Lives change suddenly and dramatically due to illness and the resulting unexpected financial strain leaves many without the means to get the medical help they need or the ability to be with loved ones during critical times. Our humanitarian missions offer love and comfort. Whether for medical or humanitarian purposes, people requesting CAIR Flight support often have no other options.

Your time, talent, and skill give hope to people who need it most. You cannot imagine the gratitude people feel and demonstrate when you offer your unique and unconditional support. Our dreams were fulfilled when we earned our wings. CAIR Flight missions help people whose dreams and lives have been dramatically changed through no fault of their own.

There is no obligation on your part. All missions are strictly voluntary and they are tax deductible. As pilot in command, you always decide to accept or decline any mission. Before each mission, CAIR Flight WAIVER forms must be signed. Those requesting a mission must be ambulatory, able to climb aboard with little or no assistance, and sit upright in a seatbelt. We are not air ambulances. Recognizing our value, the majority of the FBO's offer fuel discounts and ground fees are normally waived on all missions.

CAIR Flight pilots are required to meet the following criteria:

- 250 hours PIC
- Pilots and aircraft must be air worthy and current
- Pilot and aircraft must have current liability insurance

Please review, date, and sign the pilot application and enclose copies of the front page of your insurance certificate, medical certificate, and pilot and driver's licenses.

Flying with us is a rewarding experience and you are joining a wonderful team of volunteers. Thank you for your interest and generosity!

Sincerely,

A handwritten signature in blue ink, appearing to read "Rick Wachstein". The signature is fluid and cursive, with a long horizontal stroke extending to the right.
